

# Custom Reward

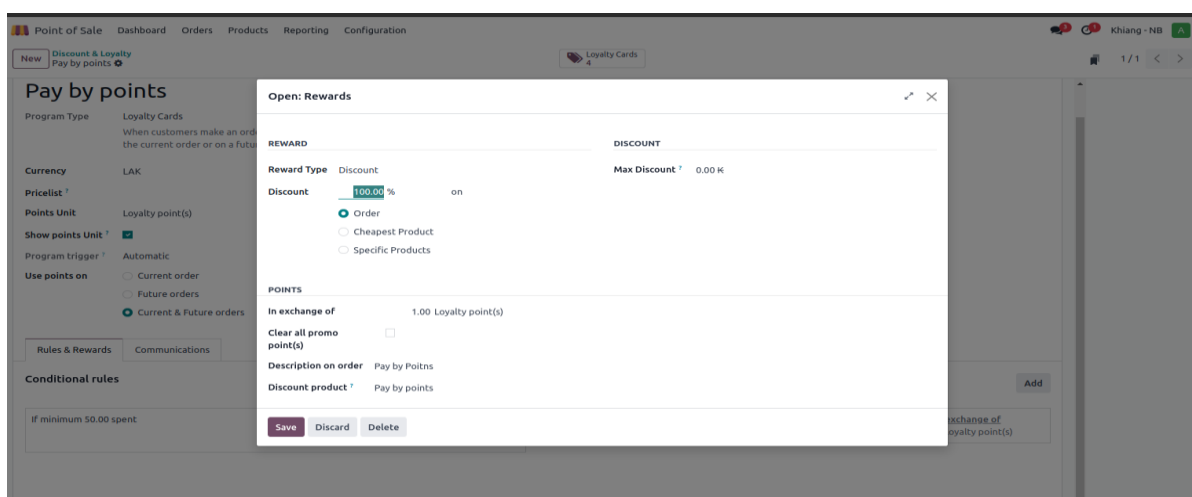

Module Name - lo\_custom\_reward

Let's see how we can implement this feature in Odoo POS.

- First, activate the cr\_custom\_reward module. Go to the Point of Sale menu, then navigate to Products, and under Products, select Discount & Loyalty.
- Create a Loyalty Program with 100% Discount Reward

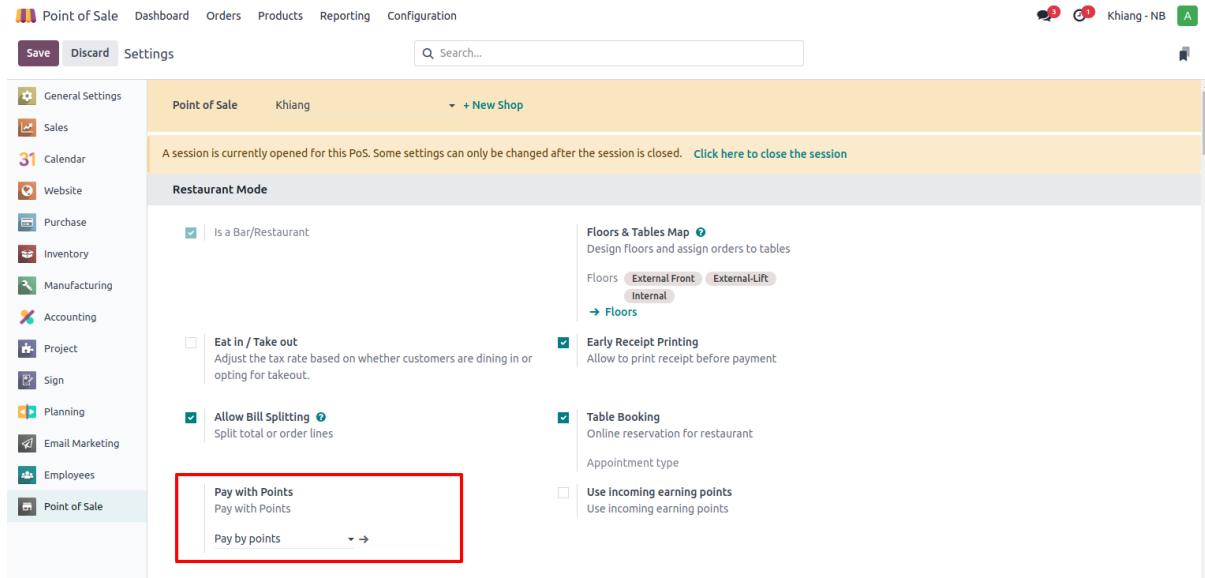

The screenshot shows the 'Pay by points' configuration screen in Odoo POS. The 'Program Name' is 'Pay by points'. The 'Program Type' is 'Loyalty Cards'. The 'Currency' is 'LAK'. The 'Points Unit' is 'Loyalty point(s)'. The 'Show points Unit' checkbox is checked. The 'Program trigger' is 'Automatic'. The 'Use points on' options are 'Current order', 'Future orders', and 'Current & Future orders', with 'Current & Future orders' selected. The 'Start Date' and 'End date' fields are empty. The 'Limit Usage' checkbox is unchecked. The 'Company' is 'Khang - NB'. The 'Available On' options are 'Point of Sale', 'Sales', and 'Website', all of which are checked. The 'Point of Sale' is set to 'All PoS'. The 'Rules & Rewards' tab is active, showing a table with two rules. The first rule is 'If minimum 50.00 spent' with a 'Grant' of '100.00 Loyalty point(s) per order'. The second rule is '100.00% discount on your order' with an 'In exchange of' of '1.00 Loyalty point(s)'. The 'Add' button is visible at the bottom right of the table.

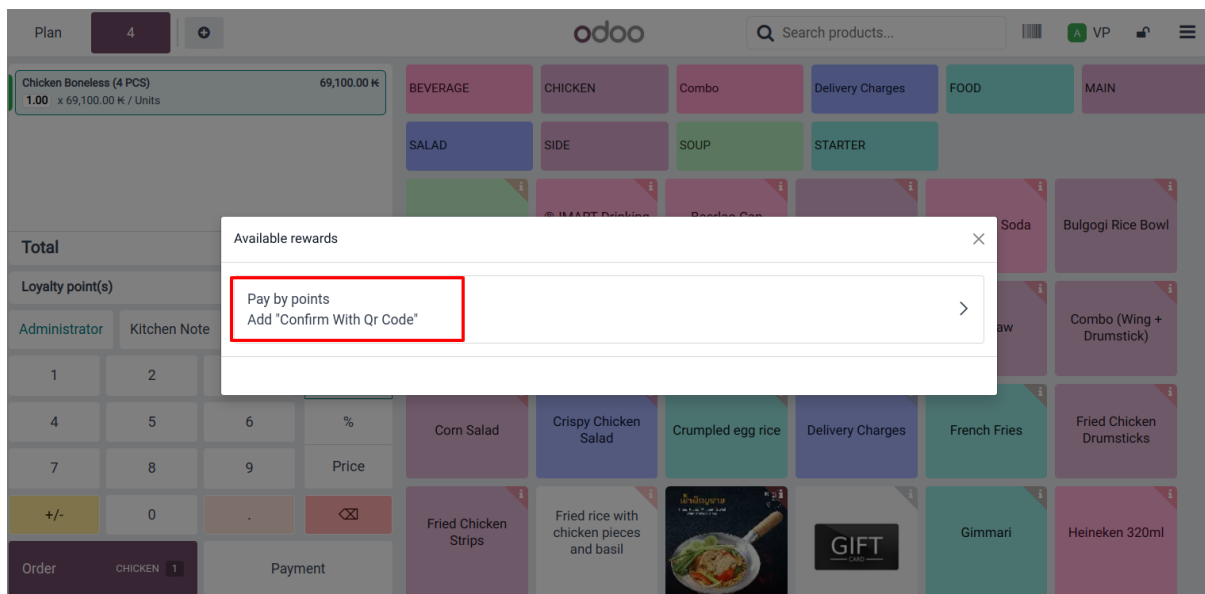

The screenshot shows the 'Pay by points' configuration screen in Odoo POS, with the 'Open: Rewards' dialog box open. The dialog box has two tabs: 'REWARD' and 'DISCOUNT'. The 'REWARD' tab is active, showing a 'Reward Type' of 'Discount' and a 'Discount' of '100.00 %' on 'Order'. The 'POINTS' section shows 'In exchange of' as '1.00 Loyalty point(s)'. The 'Clear all promo point(s)' checkbox is unchecked. The 'Description on order' is 'Pay by Points' and the 'Discount product' is 'Pay by points'. The 'Save', 'Discard', and 'Delete' buttons are at the bottom of the dialog box.

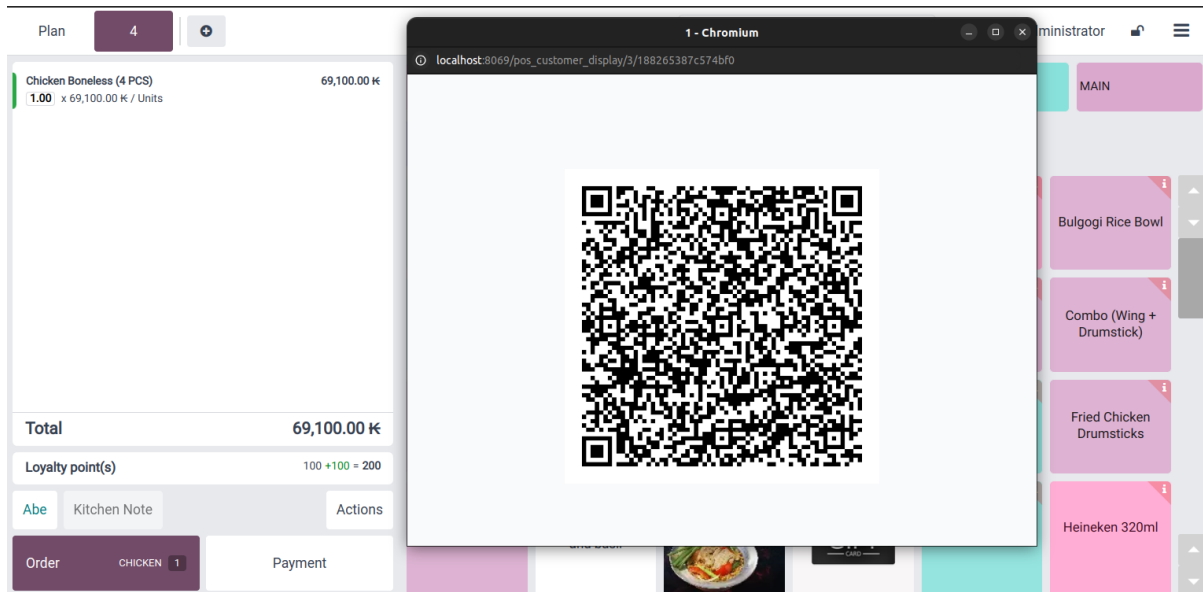

- Go to the Point of Sale menu, then navigate to Configuration, and under Configuration, select Settings. Here you will find a selection labeled "Pay with Points". You need to set Loyalty program for pay by points.

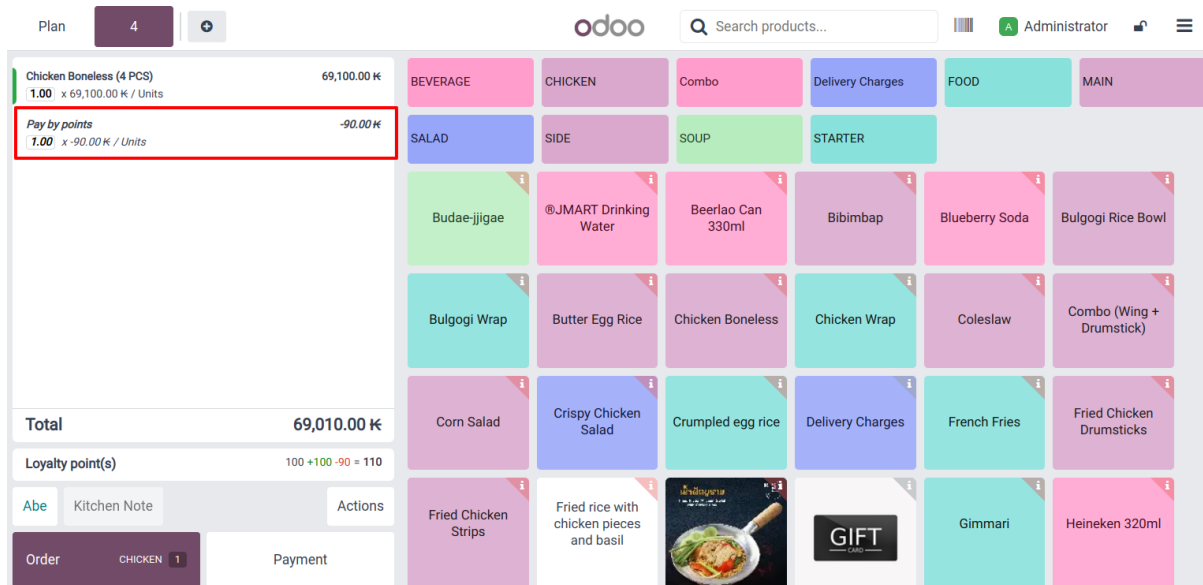

- Open POS and create a new order. After creating the new order, select the customer and click on the reward button. After clicking on the reward button, select the 'Confirm with QR Code' option.

- After selecting the "Confirm with QR Code" option, you will be able to see a QR code on the customer display.

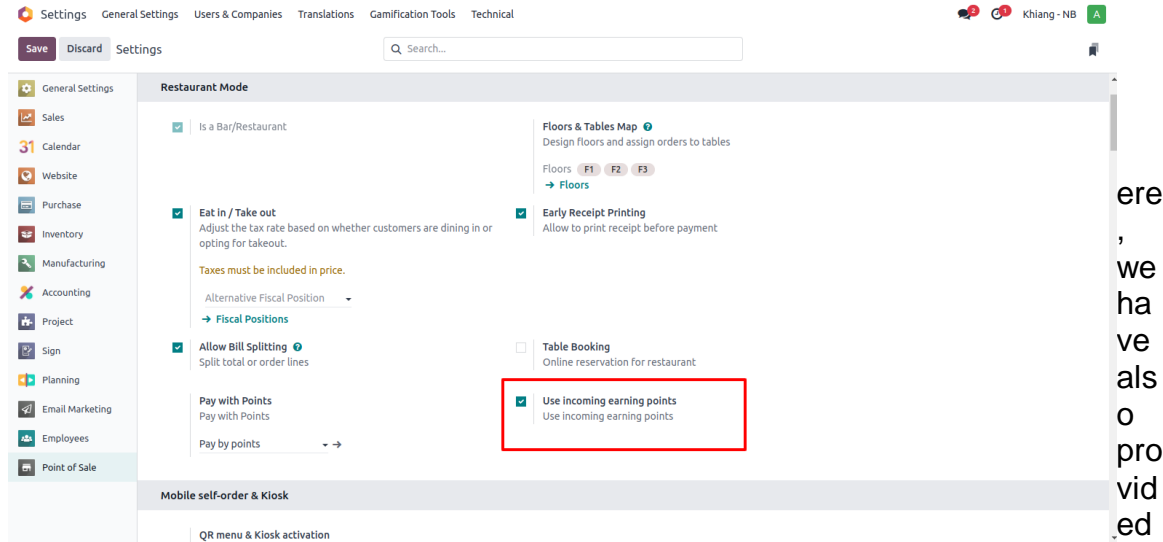

- When the user scans the QR code through the mobile app and uses the points, a line will be added to the current order in our current Order.

- Here, in the POS configuration, we also provide an option to choose whether

to allow the usage of incoming points or not.

● Here, we have also provided

the functionality for refunds. When you process a refund for an order where loyalty points were used, those points will be automatically added back to the customer's loyalty points balance.
