

Take away BOM for Take away Order

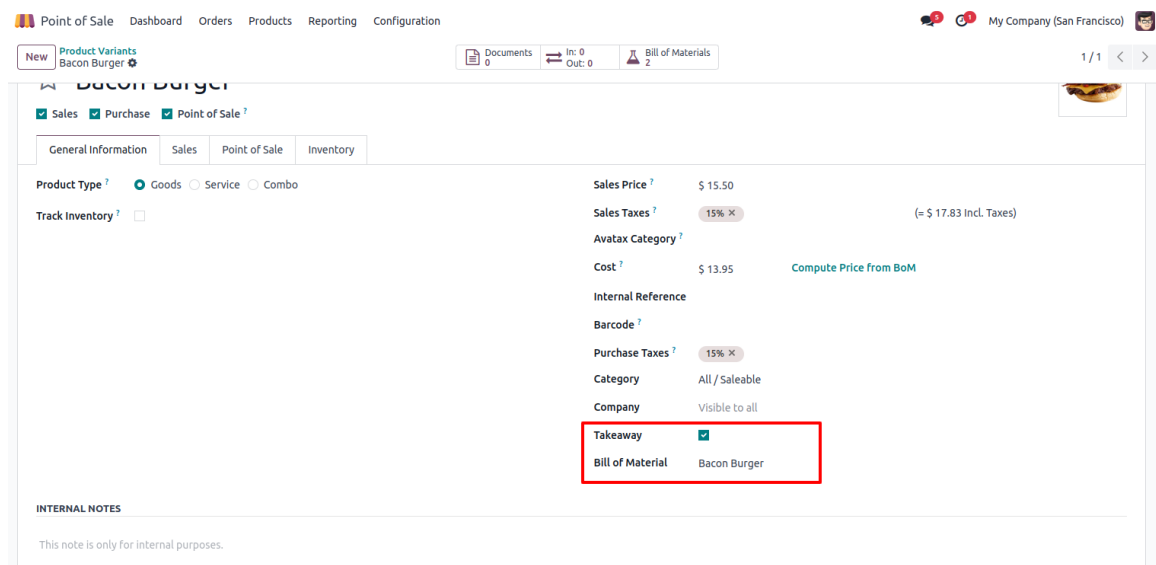

Module Name - lo_mrp_extend

Let's see how we can implement this feature in Odoo POS.

- First, activate the cr_mrp_extend module.
- Enable Eat in / Take Out

- Set a BOM for a product specifically for takeaway, open the product, enable the **Takeaway** boolean field, and select the BOM for takeaway.

- Now, when you place an order for this product and the order is marked as **Takeaway**, the selected BOM will be used.
