

Customizable POS Action Button: Color and Size Options

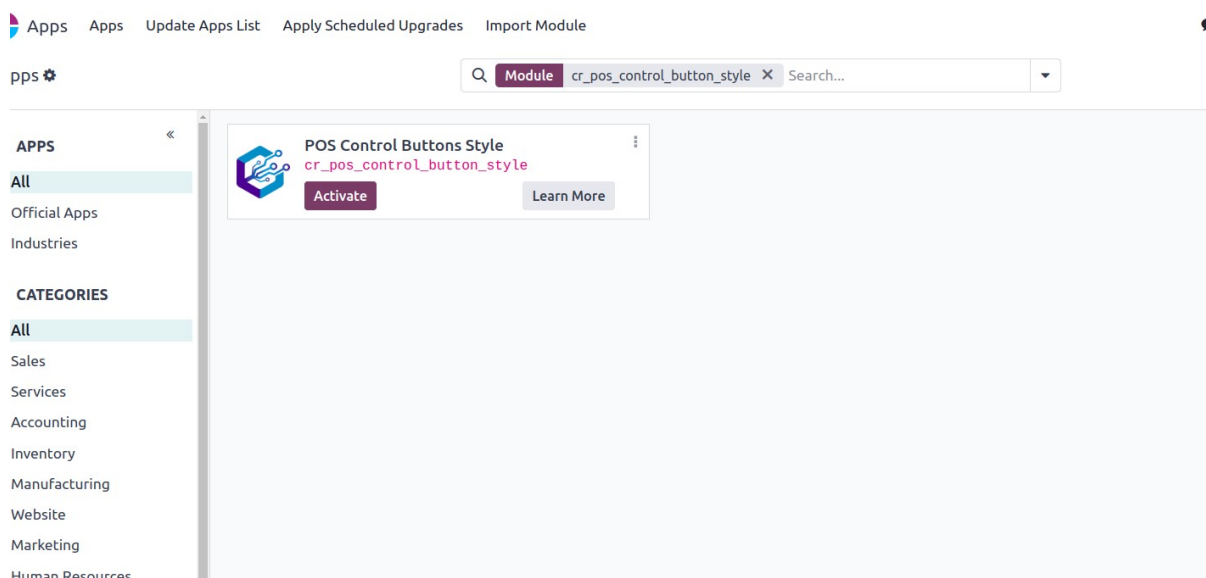

Module Name - cr_pos_control_button_style

Branch Name - cr_pos_control_button_style_18.0

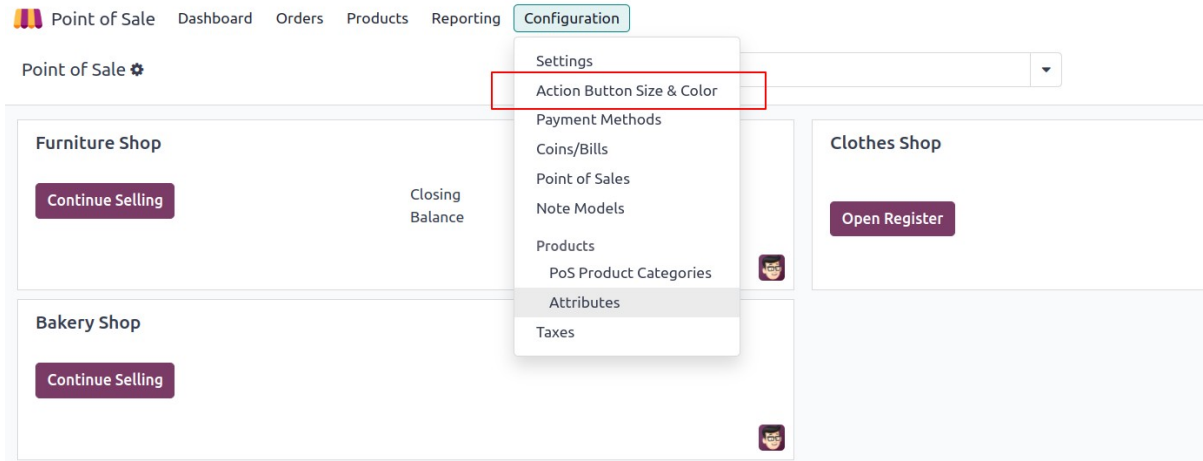

- This functionality allows for the customization of Point of Sale (POS) control buttons by enabling the configuration of their size and color.
- The button height and width can be adjusted to match specific design requirements or screen layouts, while the background color of each button can be uniquely set based on predefined options
- The customization is dynamically applied based on the configuration, enhancing flexibility and usability

Let's see how we can implement this feature in Odoo POS.

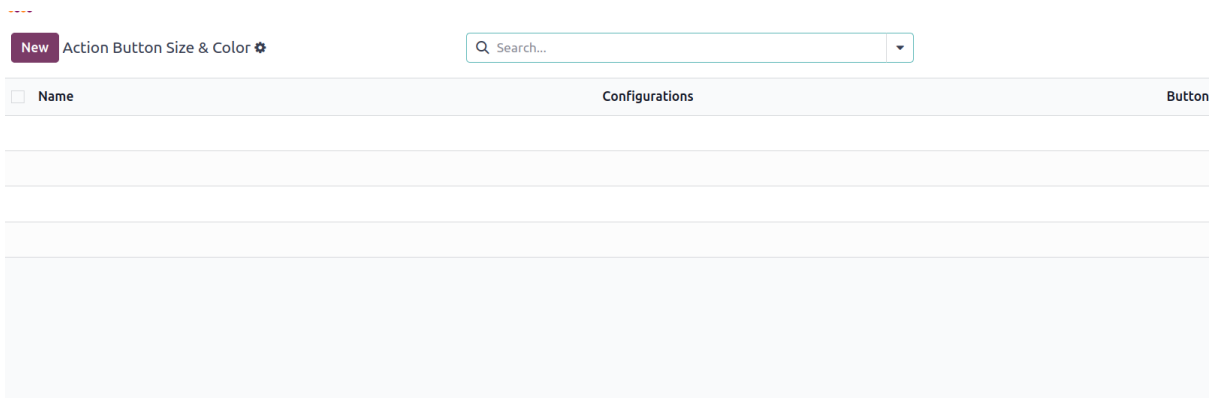

- First, go to the Apps menu, search for the cr_pos_control_button_style module, and activate it.

- Go to the Point of Sale menu, then navigate to Configuration, and under Configuration, select Action Button Size & Color.

- You can see the Size & color configuration view and create a new record.

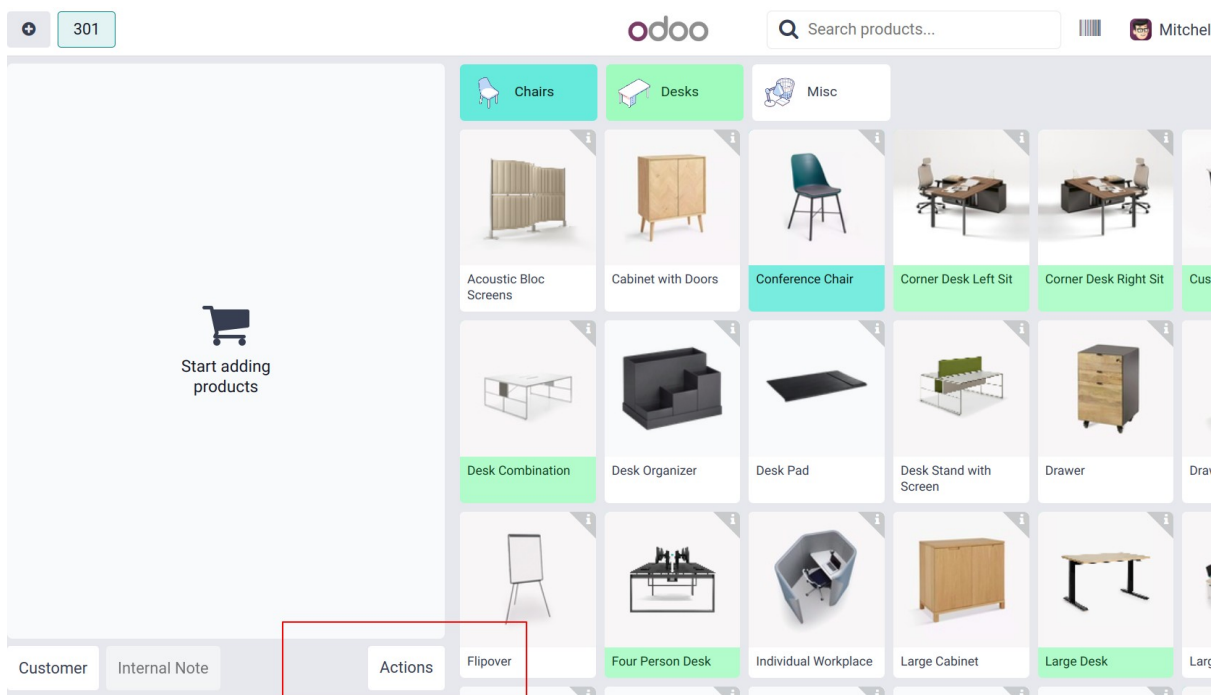

- You can configure the name of the configuration, select the shops for which you want to define color and size, adjust the button height and width, and specify the button names for which you wish to assign colors using the color picker.

New **Action Button Size & Color** Config 1  1 / 1 < >

Name	Config 1	Button Height	111.00
Configurations	Furniture Shop X Clothes Shop X	Button Width	300.00
Button Name	Button Color		
Pricelist			
General Note			
Add a line			

- Navigate to the POS shop where the feature is enabled and click on the action button to proceed.

- You will see that the action buttons, as configured, will display the color and size settings applied, with all buttons adjusted according to the configuration
