# Multi User Login In Pos

Module Name - cr_multi_user_login
Branch Name - cr_pos_void_18.0
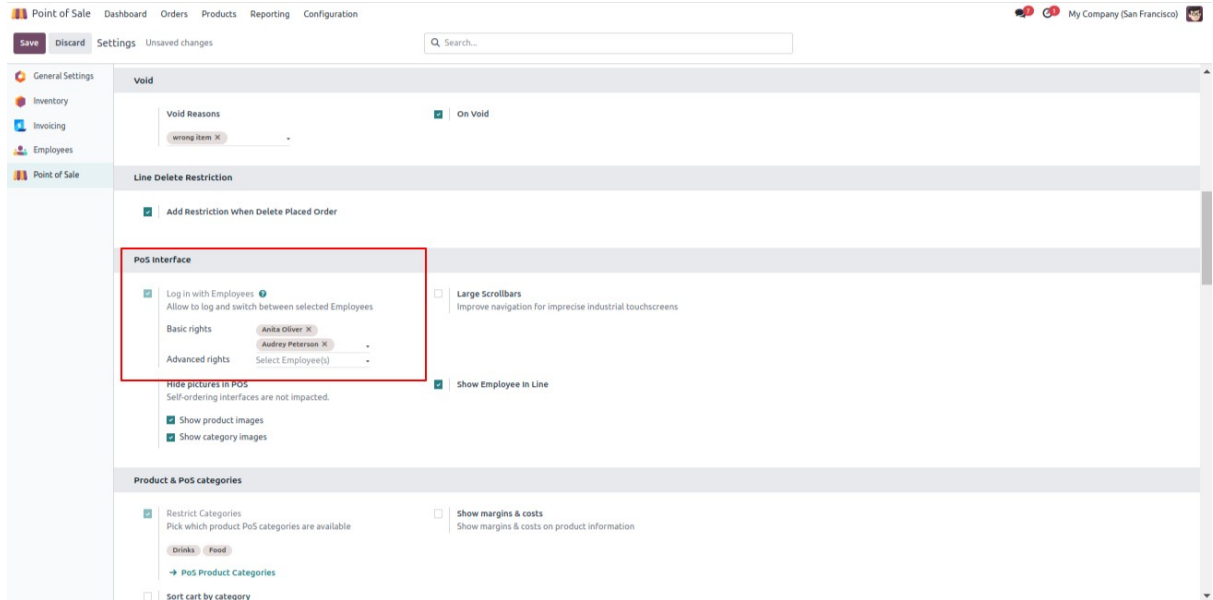

- This module provide multi device real time sync product.

 **Let's see how we can implement this feature in Odoo POS.**

- First, go to the Apps menu, search for the cr_multi_user_login module, and activate it.

● After Go to Pos Configuration and Configure **Log in with Employees.**

● And log In One device in any one user and add any product.

- And log In Other device in Diffrent user and add any product.

- In Anita User, you can see that the mutiple employee product shows up

product sync multi device and update product line
