# Show Product Ingredients in Kitchen Screen

Module Name - lo_pos_restaurant_extend

**Let's see how we can implement this feature in Odoo POS.**

- First, activate the cr_pos_restaurant_extend module. Go to the Manufacturing menu, then navigate to Products, and under Products, select Bill of Materials.

- Create a bill of material (BOM) for a product that is available in the POS.

- Now open the POS and add the product for which we created the BOM.

- After adding the product, place the order and open the Kitchen Screen. There, you will see an option to **Show Ingredients** and **Hide Ingredients**.
All   To cook **1**   Ready **0**   Completed **0**   ↺ Recall   Close ➔

T1 #501   👤 Mitchell Admin   👥 8

To cook   ⏱ 3'

1x Bacon Burger
  - Sides : Belgian fresh homemade fries
  Hide Ingredients
  chesse   Butter Croissant
